Your Authorized Watlow Distributor Is:

Watlow's DIN-A-MITE® Style B power controller provides a low-cost, highly compact and versatile solid state option for controlling electric heat. You also get all the quality you expect from a Watlow designed and manufactured product. DIN rail and back panel mounting are standard on every control. There is no need to worry about mercury; the DIN-A-MITE controller is mercury free.

Capabilities include single-phase and three-phase zero cross switching up to 40 and 22 amps, respectively, at 600V~(ac) (see rating curve). A unique, integrated design removes the guesswork associated with selecting a proper heatsink and adequate terminations for the application.

Variable time base, 4-20mA process control or V_{\approx} (ac/dc) input contactor versions are available. A shorted SCR alarm option is also available. All configurations are model number dependent and factory selectable.

The DIN-A-MITE power controller is made in the USA.
