

## SCR Power Controller Delivers Up To 100 Amps in a Smart Package

The Watlow DIN-A-MITE® Style D SCR power controller provides you with an inexpensive, versatile product for controlling heat in an efficient package. You also get all the quality you expect from a Watlow designed and manufactured product. The standard back panel mounting footprint is equal to that of an industry standard mercury displacement relay. There is no need to worry about mercury; the DIN-A-MITE controller is mercury free.

The DIN-A-MITE Style D is capable of zero cross switching up to 100 amps single phase, at 600V~(ac) at 30°C (86°F), depending on the model selected. Gang together the input of two or three controllers and you can control three phase. It is totally touch-safe and includes standard back panel mounting, on-board semiconductor fuses (accessible from the front) and a current transformer option for external load current monitoring. An optional "shorted SCR detector" feature is available on some models. UL® 508 and C-UL® and CE approved. These agency approvals are ideal for those panel builders that require agency approvals on their panels and cabinets.

Variable time base, 4-20mA process control, or  $V_{\approx}(ac/dc)$  input contactor options are available. All configurations are model number dependent and factory selectable.

The DIN-A-MITE Style D power controller is made in the USA.

UL® and C-UL® are registered trademarks of Underwriter's Laboratories, Inc.
